Eighth Vector Mechanics for Engineers: Statics Edition 5 - 3 Introduction • The earth exerts a gravitational force on each of the particles forming a body These forces can be replace by a single equivalent force equal to the weight of the body and applied at the center of gravity for the body • The centroid of an area is analogous to the

Engineering Mechanics: Dynamics (12th Edition)

principles of mechanics apply to real-world situations In some sections, photographs have been used to show how engineers must first make an idealized model for analysis and then proceed to draw a free-body diagram of this model in order to apply the theory New Problems There are approximately 50%, or about 850, new problems
